How to use an inhaler with a spacer
Works as well as a nebulizer!

1. Take cap off and shake
   - Take cap off the inhaler. Check for and remove any dust, lint, or other objects. Shake the inhaler well.

2. Attach spacer
   - Attach the inhaler to the spacer.

3. Breathe out
   - Breathe out all the air away from the spacer.

4. Press the inhaler
   - Put lips around device, press inhaler one time. This puts one puff of medicine into the spacer.

5. Breathe in deeply & slowly
   - Breathe in deeply and slowly, and hold your breath.

6. Hold your breath — 5 secs.
   - Remove the device from the mouth. Then hold your breath for 5 secs. Then breathe normally away from the spacer.

7. Wait 1 minute
   - If your child needs to take another puff of medicine, wait 1 minute. After one minute, repeat steps 3 to 6.

8. Rinse — Don’t swallow!
   - Rinsing is only necessary if the medicine you just took was an inhaled steroid. Have your child rinse his or her mouth out with water after the last puff of medicine. Make sure your child spits the water out. Do not allow the child to swallow the water. Recap the inhaler.

Asthma discharge plan

1. Take your asthma medicine

   Your oral steroid is:
   - Things to know about oral steroids:
     - is another powerful “rescue” medicine
     - if you were given these in the emergency room, it is very important that you finish them!

   - 1st dose time/date
   - How much
   - How often
   - For how long
   - It is very important you complete the dosage

   - [ ] Pills
   - [ ] Liquid

   - Inhaling
   - [ ] Number of puffs
   - [ ] How often
   - [ ] For how long

   - Inhaling
   - [ ] Number of puffs
   - [ ] How often
   - [ ] For how long

   - Mask
   - [ ] Nebulizer

   - After that, use ONLY when symptoms occur

   - It is typically albuterol with a name like: Proventil, Pro-Air, Ventolin, Xopenex

   - Your “rescue” medicine is:

   - Inhaling
   - [ ] Number of puffs
   - [ ] How often
   - [ ] For how long

   - Mask
   - [ ] Nebulizer

   - Take every day EVEN IF no visible symptoms

   - Mark your meds at the pharmacy:

2. See your child’s doctor within 3 days of your ER visit

   Doctor’s name
   - Clinic telephone number
   - Your appointment date and time

   - Mask
   - [ ] Nebulizer

   - Other:

   - Mark your meds at the pharmacy:

   - green sticker for “controller” medicine

   - red sticker for “rescue” medicine

   - From the American College of Chest Physicians.
   - Illustrations by Paula Falco

   - Other:
Read the signs

**GREEN ZONE**
**Go play**
Even if your child shows no signs of breathing problems, keep using the "controller" medicine every day.
- breathes easily
- plays as usual
- peak flow is at normal level
- sleeps soundly
- no coughing or wheezing

**YELLOW ZONE**
**Call doctor**
If your child shows any of these signs, use "rescue" medicine right away, keep using "controller" medicine, and call your doctor.
- breathes fast when standing in place
- hard to sleep because of breathing problems
- breathing does not get better within 20 minutes of taking "rescue" medicine
- coughs a lot at night
- hurts to breathe deeply

**RED ZONE**
**Get help**
If your child has any of these signs, use "rescue" medicine, and go to the emergency room or call 911.
- hard time saying a full sentence without a breath
- hard time walking
- hard time breathing when sitting in place
- breathing gets worse within 20 minutes of taking "rescue" medicine
- ribs show when breathing
- breathing so hard that they are drowsy or sleepy
- lips or fingernails are grey or blue

Stay on top of asthma

- **Don’t wait! Call with questions**
  - Call your child’s regular doctor as soon as possible to help you understand your child’s asthma and home treatment plan.

- **Identify your child’s asthma triggers**
  - Build a trigger list of what seems to make your child’s asthma act up. Add to that list as you notice new triggers. Try to help your child avoid these!
  - If your child has a cold, use your child’s action plan; and help them to blow their nose.
  - Avoid smoking—a known asthma trigger—and avoid having your child in a house where someone smokes.

- **Give medications as prescribed**
  - Review how to use the inhalers with your child’s doctor.
  - Develop tricks to help remind you to give the medications.

- **Take your child to the doctor regularly**
  - Your child’s doctor is there to help—they want to see how well your child is doing and to review your child’s symptom control. Together you and your doctor will discuss a new Asthma Home Plan, with instructions for when your child’s asthma is under control and when it is not well-controlled.

- **Set an alert on your smartphone**
- keep medicine by your coffee pot

**Here are some examples of common asthma triggers:**
- What are your child’s triggers?
